Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-33 are pending in the application. The claimed inventions are subject to election/restriction requirements as outlined below.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 12-15 and 23-26 are drawn to a method, corresponding system and computer program product that embody the method for managing charging transactions having the features of enabling designation of allowed vendor(s) and corresponding amount limit chargeable by the specified vendor and determining whether a charging transaction for a specified amount by a charging vendor is within the designation.

- II. Claims 5-11, 16-22 and 27-33 are drawn to a method, corresponding system and computer program product that embody the method for limiting charging transactions having the features of determining whether an account holder for a charge account has specified vendor specific charge restrictions for charging against the charge account and determining a vendor identifier from the charge authorization request and comparing

Art Unit: 3624

the vendor identifier to a list of vendor identifiers for the vendor specific charge restrictions.

3. The inventions are distinct, each from the other because:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as designation of allowed vendor(s) and corresponding amount limit chargeable by the specified vendor and determining whether a charging transaction for a specified amount by a charging vendor is within the designation. See MPEP § 806.05(d).

4. In the instant case, invention II has separate utility such as determining whether an account holder for a charge account has specified vendor specific charge restrictions for charging against the charge account and determining a vendor identifier from the charge authorization request and comparing the vendor identifier to a list of vendor identifiers for the vendor specific charge restrictions. See MPEP § 806.05(d).

SPECIES:

Art Unit: 3624

5. The applicant is required to elect among the following species in the event invention II is elected.

If invention II is elected, one of the following species of the generic invention indicated in the bracket must be elected.

Claims 5-7 and (8 or 9 or 10) and 11 (method); 16-18 and (19 or 20 or 21) and 22 (system); and 27-29 and (30 or 31 or 32) and 33 (computer program). Note that in each category (method, system and computer program), the claims must be elected such that the system claims and the computer program claims correspond to the respective method claims.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 18, 34 and 40 are generic.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3624

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
8. In the event applicant elects the aforementioned species, Applicant is further required to provide where support in the descriptive portion of the specification may be found to support such an election.
